

Mechanix Excellence

Mechanix™ Brushless, Microprocessor-Controlled Motor System
for Dental Practices & Laboratories.

Mechanix is compact enough for dental practices, but powerful enough for dental labs. Its brushless motor system allows for quiet, comfortable operation while the built-in microprocessor control ensures constant performance. Mechanix also features a wide speed range for use with virtually all materials, from acrylics to most metals. If precision is your priority, you'll appreciate the mechanical excellence of Mechanix.

Microprocessor Control

- > LED information display
- > Automatic handpiece recognition
- > Variable speed control
- > Error/overload indicator
- > Memory repeat function

Brushless Motor

- > Low noise and vibration
- > High torque (4 Ncm)
- > Ergonomic design
- > Comfortable fit in hand
- > Sealed, maintenance-free

Compact, Durable Control Unit

- > 4 1/2" W x 7" D x 5" H
- > Fluid-resistant outer casing
- > High-strength enclosure
- > Optional foot control
- > 1-year warranty
