

Choices.

Save on supplies? Save on taxes? Or both?

You have a choice: continue paying for film, mounts, chemicals, labor and maintenance. Or go digital and save money in more ways than one. Computers and imaging equipment from BencoNET may be expensed under IRS Section 179, making it more cost-effective than ever to go digital. (And they increase the value of your practice, too.)

At BencoNET, we'll be with you every step of the way to help maximize your investment. We understand that every practice is unique. That's why we offer more equipment brands than any other dental technology provider. Instead of suggesting a "one size fits all" package, we'll work with you to customize the right solutions for your individual needs. With BencoNET, you can have it all: selection, savings and service.

We create solutions to fit your practice because we know every office is different.

We've installed virtually every digital radiography system in existence.

We offer the widest range of hardware and software from the most respected brands.

"Very accommodating, very knowledgeable..."

Dr. A. Giannetti, Willow Grove, PA
