

# Here's what practices say about BencoNET...

**“I love our BencoNET package. I can’t imagine my practice without it.**

I always wanted to have a computerized office. Another provider worked with us, but our practice was getting bigger, we were adding more equipment, and we needed a better network. We called BencoNET and the transition was easy. Even integration of additional digital equipment went very smoothly.”

DR. YOOSON KIM  
MORGANTOWN, PA

**“The upgrade made it so simple! And BencoNET has reduced paperwork in our practice. We don’t have to worry about X-rays falling out of charts. That’s the main thing. There are no more chemicals needed for processing. Things flow a lot easier. BencoNET is going to help me work a couple more years. I recommend it to everybody. I tell all my friends they need to get this system.”**

DR. PATRICK ALMERICO  
PLANT CITY, FL

**“BencoNET got us online and made our work so much easier. We love the digital X-rays. It’s really nice to have them right in the computer. We no longer need to sift through all the film in a patient’s folder. And the service support we receive is excellent. We’re very impressed. Everyone is very knowledgeable and courteous too.”**

MARIANNE WALAKAZAGE, OFFICE MGR  
DRS. WINNER, POWERS & RAYMOND  
FLEMINGTON, PA

# BencoNET put all their dental technologies into one, easy-to-use system.

**“BencoNET really helped our practice a great deal. We have always been receptive to any technology — our computer system was just another part of it. When we redesigned the entire office, we put computers in every room and BencoNET really helped.”**

DR. JEFFREY DeMARTINO, PHILLIPSBURG, NJ

**“The installation went smoothly and I am very pleased with the people I have worked with to get my office where it needed to be. I now have a chartless office, digital radiographs, intraoral cameras, and HD TV’s everywhere.”**

DR. JAKE PEDRAZA, LAND O’ LAKES, FL

**“The installation of BencoNET has been very positive. Our service is very thorough and I’m pleased with how quickly the technicians get to the office. In addition, our patients like seeing the digital X-rays and computers in the operatories. It’s important that they see that we’re up to date.”**

DR. JEDIAH JANISSE, WOODSTOCK, VT
